

Welcome to the Jungle: Jumanji!

Thomas Jefferson Model United Nations Conference

TechMUN XXXIII

High School Specialized Agency

Co-Chairs: Adarsh Iruvanti & Arnav Majeti

Thomas Jefferson High School for Science and Technology

March 13th-14th, 2026

Dear Delegates,

Welcome to TechMUN XXXIII's Welcome to the Jungle: Jumanji committee! We are beyond excited to hear you all debate and work together to survive and win the game, save Jumanji, and along with it, the world. This committee takes place in the Jumanji video game, where delegates will have to complete the game's quest in order to escape. Each delegate represents a different player or in-game character with different attributes, strengths, and weaknesses, whether they are real characters from the movies or fictional ones created for the purpose of this committee. Thus, everyone is expected to use their unique skillsets and views throughout the TechMUN weekend.

As your chairs, we are looking for delegates who put themselves out there, incorporate innovative solutions, craft compelling mod speeches, and creatively adapt to the flow of committee to the best of their ability. Be warned, the jungle will throw everything at you. We also want to see you all exhibit strong leadership and collaboration qualities whilst maintaining diplomacy with others, from unmods to updates. Every delegation has a purpose and a unique role to play, so relevancy throughout committee is key.

With that being said, both of us hope that we can make your experience in committee as fun and engaging as possible. We want you to continue to learn, grow, and improve as delegates regardless of whether or not this is your first spec, or if you're a seasoned veteran. If you have any questions at all, please do not hesitate to email us at jumanjitechmun2026@gmail.com, and we look forward to seeing you at TechMUN XXXIII!

Adarsh Iruvanti & Arnav Majeti

Co-Chairs, Welcome to the Jungle: Jumanji

Committee Background and Introduction

Jumanji is a mysterious, supernatural game that strikes the balance between fictional gameplay and reality itself. In *Jumanji* (1995), the first film in the series, the game appears as a cursed boardgame that traps a boy named Alan Parrish. Decades later, siblings Peter and Judy find and play the game themselves, reviving the curse but allowing Parrish to return. However, each roll of the dice introduced several chaotic events in the real-world: wild jungle animal stampedes, stormy monsoons, and even a hunter who wished to hunt Parrish down. The only way to end the chaos was to continue playing until the last turn.

In the reboot film of the series, *Jumanji: Welcome to the Jungle*, a teenager named Alex Vreeke, a gaming enthusiast, is given the same boardgame but finds it uninteresting. When the game transforms into a video game, Vreeke decides to play but is tragically sucked in himself. Decades later, 4 teenagers stumble across the game in the school's basement during detention, and are teleported to an alternate world inside the game — Jumanji. The game traps them indefinitely as players with Vreeke until they complete the main quest by passing each level, whilst simultaneously surviving the game's dangerous perils at every turn and maintaining their three lives. The quest, to restore the Jaguar's Eye to the Jaguar Shrine in order to save Jumanji from the corruption of Russell Van Pelt and his mercenaries, is riddled with puzzling obstacles, dangerous wildlife, and a need to work together to overcome each level and save Jumanji in order to return home. Each game has a different quest. For example, in the third film, *Jumanji: The Next Level* (2019), the main characters returned to find the Falcon Jewel that had been taken by Jurgen the Brutal, a conqueror and warlord, and return it to its Temple to prevent Jurgen's plans of domination from becoming reality.

Note: For more information, visit the Jumanji Wiki.

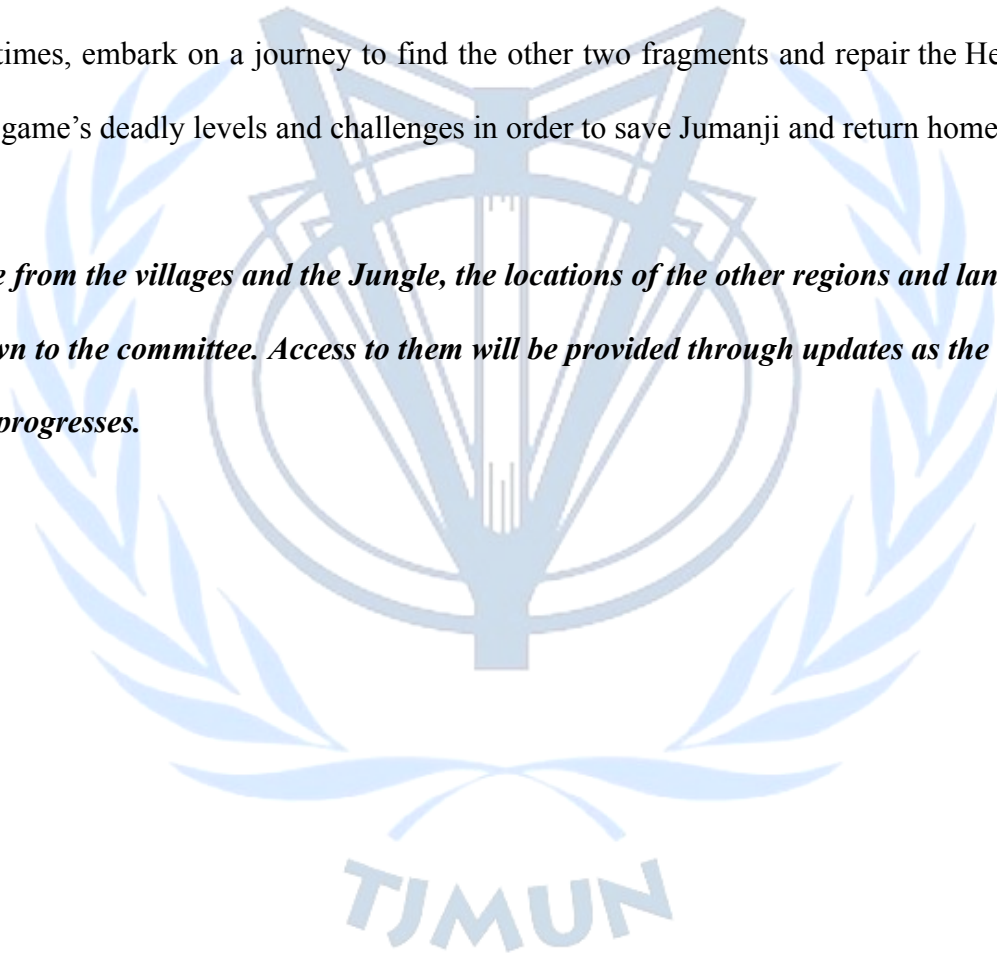

Current Situation

This committee takes place in a slightly altered video game world of Jumanji, where delegates either represent players or in-game characters/NPCs (non-player characters). The realm of Jumanji consists of five ecologically diverse regions: the Central Jungle, the Mighty Roar Valley, the Dunes, the Swamplands (also referred to as “The Moat”), and the Snowy Mountains. The Central Jungle is a dense rainforest with an abundance of natural resources as well as a variety of deadly flora and fauna (snakes, hippos, man-eating plants, etc). It is also where Parrish’s old, abandoned treehouse is located, as well as where players initially spawn in. Jumanji also has a multitude of villages, small towns, and trading markets. A key landmark of Jumanji is the Bazaar, which rests on a cliffside at the border between the Mighty Roar and the Jungle. Another key landmark is the Oasis, located in the Dunes. The Moat is known for its roped bridges between tall trees filled with Mandrills, hanging over the mosquito-infested marshes along with other swamp creatures. The Snowy Mountains are a cold and treacherous mountain range containing Mt. Zhatmire, the tallest mountain in Jumanji. An Abandoned Fortress, previously home to Jurgen and his Brute Army before their disappearance, rests on this mountain.

Jumanji is currently under serious danger. After decades of peace and prosperity, re-activating the game caused the Heart of Jumanji, the source of Jumanji’s life and magic located in a sanctum residing on the peak of Mt. Zhatmire, to shatter into three distinct fragments that have scattered throughout the land. As a result, the world has turned to corruption, darkness, evil, and chaos. Jumanji’s ecosystems are slowly rotting and dying out, creatures are acting dangerously chaotic and out of control, thieves and gangs — including Van Pelt and his mercenaries — are raiding population centers and trade routes in search of the missing fragments

for wealth and power, and violence is ensuing between several villages and tribes — leading to a lack of trust and an increase in division and isolationism. Nigel Billingsley, an NPC field guide, was initially recruited by Van Pelt to locate the first shard, but after it was found, Billingsley realized that it was too dangerous to remain in Van Pelt's possession. Thus, he stole it from the mercenary camp and ran away overnight. He decides to leave it in the hands of the players (the delegates) after a brief encounter. Your quest is to resolve Jumanji's plethora of issues during these dark times, embark on a journey to find the other two fragments and repair the Heart, and survive the game's deadly levels and challenges in order to save Jumanji and return home.

Note: Aside from the villages and the Jungle, the locations of the other regions and landmarks are unknown to the committee. Access to them will be provided through updates as the committee progresses.

Topic 1: Restoring Unity, Trust, & Security Among Jumanji's Inhabitants

Relevant Issues

The destruction of the Heart of Jumanji has triggered a profound social collapse. Conflicts between villages and their inhabitants and fear of Russell Van Pelt's devastating mercenary raids have shattered the mutual bonds of trust that once held Jumanji together. Due to the scarcity of essential resources (attributed to raids and ruined harvests), as well as the reduction of trade due to theft, communities throughout Jumanji are desperately hoarding what little they have, viewing any outside as a potential scavenger or thief. Such scarcities fuel conflicts between inhabitants and locals, making any aid-related solution logistically difficult.

This collective uncertainty and fear has also led to isolation and division. Villages are beginning to strictly prohibit free entry and have already started blocking trade routes and paths of travel. Because communications have ceased and old partnerships/alliances have faded away, distrust has grown between villages, resulting in an escalation of conflicts between neighboring communities. Crime syndicates and gangs have perpetuated this division, selling information and stolen goods to the highest bidders.

In addition to all of these issues, Van Pelt's greed for gold and desire to obtain the three Heart fragments in order to control Jumanji has led to recurring raids by his armed mercenaries on suspected camps and villages across the land. Their access to vehicles (motorcycles, jeeps, etc.) in addition to quick mobility through the jungle have made them difficult to track or anticipate. Without solving these issues, interactions with NPCs and local communities, as well as the safety of the treacherous journey itself, will be much more difficult and thus must be addressed.

Possible Solutions

To address these divisive issues, we can explore several strategies. One important factor is dealing with scarcity. The committee can assist villages in scouting out for potential areas with more promising yields, and establish a way to neutrally distribute such resources to all communities. Furthermore, it is important to instill confidence in Jumanji's inhabitants regarding the quest to secure the three fragments to rebuild the Heart and restore peace and abundance.

It is also crucial to mediate diplomacy and unity between villages. Creating a framework for an agreement or a summit is key to finding ways of brokering resource-sharing deals and solutions to intercommunal disputes, prioritizing the safety of individuals and locals during conflicts, and protecting trade from crime and theft in order to ensure the free flow of goods.

Lastly, dealing with Van Pelt's mercenary raids is not just necessary for Jumanji's communities; it is also necessary for the players. Establishing methods of fortification and defense for villages, as well as developing methods to stop Van Pelt's plans and reduce his ability to plunder population centers is also a recommended approach in fostering security and safety across Jumanji. Building solutions to these challenges requires cooperation and the use of all characters' skillsets and strengths.

Questions to Consider

1. How should we prioritize immediate humanitarian aid to build trust and security amongst Jumanji's locals?
2. What long-term diplomatic structures and frameworks can be implemented to ensure lasting cooperation, knowing resources and time are limited?

3. How can a unified front be built while some villages actively distrust or conflict with others? Should we take sides in local disputes, or act as strictly neutral mediators?
4. How should we engage with thieves, criminal members, and Van Pelt's mercenaries? Is it more effective to address the scarcity, division, and lack of protection/defense within villages or confront Van Pelt directly?
5. What assurances can be offered to villages that allying with the committee will not make them a greater target for Van Pelt's retaliation?

Topic 2: Survival & Logistical Preparations for the Perilous Journey

Relevant Issues

The primary obstacle for players and for in-game characters is navigating a fundamentally unstable world. Not only has Jumanji's geography faced several glitches in addition to corruption, but known paths throughout the jungle have been overrun by aggressive, mutated flora and fauna. Jumanji is typically home to a wide, diverse variety of creatures, but due to the shattering of the Heart, many turned dangerous, chaotic, and overall hostile to humans and players in particular. For example, carnivorous plants, rhino and elephant stampedes, venomous creatures, and more pose a significant threat.

In addition, players and characters have not yet utilized their own abilities, resources and skills to prepare for the quest ahead. The Parrish Treehouse, although old and overgrown, provides shelter but little else for a proper journey. There are no stockpiles of food, medicine, or tools capable of surviving the harsh biomes, dangerous encounters, or challenging obstacles ahead, especially in a place like Jumanji where everything is unpredictable and anything can happen at any moment. The nearby Transportation Shed may contain vehicles, but their condition is unknown. Furthermore, the unique strengths and critical weaknesses of each player avatar or in-game character must be strategically factored into plans; a single weakness could doom the entire group if triggered at the wrong moment. Every decision from now carries immense risk, and without meticulous planning and preparation using everyone's strengths, the quest will fail before it truly begins.

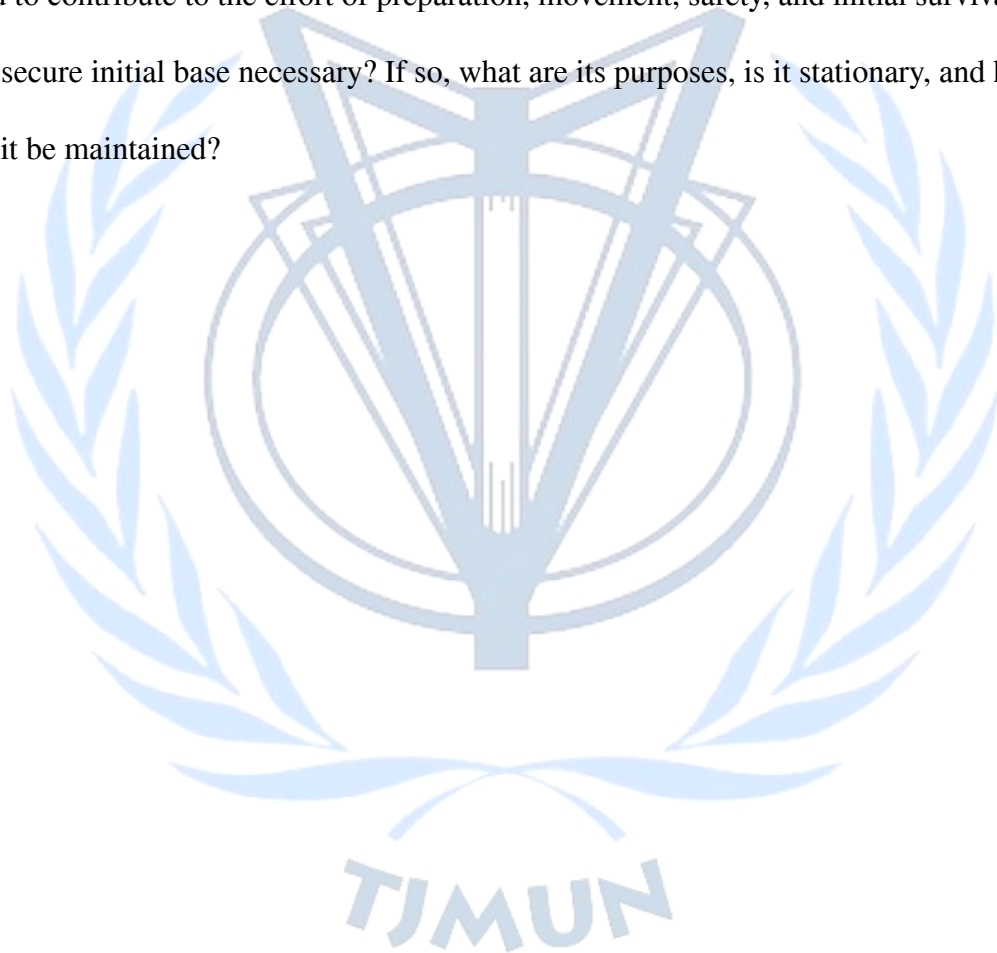

Possible Solutions

There are numerous things to consider when preparing for a quest in this instance of Jumanji. Dealing with the apparent glitches and corrupted environments is of utmost priority as they have the ability to scramble, alter, or even delete specific objects or areas. Although these glitches cannot actually be fixed without restoring the Heart, it is possible to find a way to work around them, especially in a video game setting, by identifying and scouting out for glitched zones, and redirecting or avoiding immediate safety threats.

Moreover, every committee member has a unique skillset and list of traits that define what roles they could potentially play and what resources they can access to prepare for the journey or for possible events. Whether it be related to food sources, tools, navigation, protection, antidotes/methods for healing, gold coins for purchasing power, transportation/construction, etc., delegates must work together to find and develop unique, innovative solutions to deal with potential problems within the jungle itself or challenges that lie ahead. Other locations, including Van Pelt's camp and the Transportation Shed, are also located somewhere in proximity within the Central Jungle and can also be accessed and utilized by specific members. It's also possible for the committee to secure a home base of operations if necessary, utilizing a specific location or revamping the Parrish Treehouse to serve as a place to reconvene, avoid mercenary raids/stampedes/dangerous creatures, and/or gather necessities before moving onto the first Level. Self-sufficiency and resilience, as well as hybrid multifaceted methods and solutions, are all key aspects of successful preparation for Jumanji gameplay and survival.

Questions to Consider

1. How should players and characters delegate roles and tasks? Is it better to stay unified or to divide responsibilities up amongst different groups?
2. How can players' weaknesses be avoided from impacting the group's success?
3. What resources, strengths, and abilities do delegates have at their disposal that can be used to contribute to the effort of preparation, movement, safety, and initial survivability?
4. Is a secure initial base necessary? If so, what are its purposes, is it stationary, and how can it be maintained?

DOSSIER

Welcome to the Jungle: Jumanji

1. Dr. Smolder Bravestone

- a. A fearless archaeologist and natural leader known for courage and strategic thinking. Often takes charge in high-risk situations and prioritizes team survival.

2. Ruby Roundhouse

- a. A highly skilled martial artist with strong observational instincts. Balances empathy with practicality and excels in crisis decision-making.

3. Franklin “Mouse” Finbar

- a. A zoologist with deep knowledge of animals and ecosystems. Though cautious, he provides critical scientific insight and risk analysis.

4. Professor Sheldon “Shelly” Oberon

- a. A cartographer and intellectual strategist who relies on logic and planning. Offers analytical solutions and navigational expertise.

5. Spencer Gilpin

- a. A thoughtful and introverted gamer who often grows into leadership roles. Values intelligence, teamwork, and long-term strategy.

6. Martha Kaply

- a. Highly intelligent and pragmatic, Martha prioritizes logic and preparation. She is cautious but capable of decisive action when needed.

7. Anthony “Fridge” Johnson

- a. Athletic and protective, Fridge is loyal to his allies and driven by teamwork. He prefers direct solutions to complex problems.

8. Bethany Walker

- a. Social and emotionally perceptive, Bethany adapts quickly to new environments. She excels at diplomacy and morale-building.
- 9. Alex Vreeke**
- a. A long-time survivor of the game with extensive firsthand knowledge of Jumanji's dangers. Resourceful and resilient under pressure.
- 10. Nigel Billingsley**
- a. The formal and informative NPC guide of Jumanji. Provides mission directives and structured information to players.
- 11. Van Pelt**
- a. A relentless hunter and antagonist who represents order through force. Strategic, intimidating, and mission-focused.
- 12. Ming Fleetfoot**
- a. A stealthy and cunning thief skilled in agility and deception. Operates strategically and values personal gain.
- 13. Jefferson "Seaplane" McDonough**
- a. Charismatic and adventurous, he prioritizes survival and bold maneuvering. Often uses charm to influence negotiations.
- 14. Eddie Gilpin**
- a. Spencer's grandfather, stubborn yet courageous. Brings old-school wisdom and resilience to difficult scenarios.
- 15. Milo Walker**
- a. Kind-hearted and reflective, Milo values loyalty and personal sacrifice. Often acts as a moral compass within the group.
- 16. Jurgen the Brutal**
- a. A powerful warlord who rules through fear and strength. Represents authoritarian leadership and territorial control.
- 17. Nora Shepherd**
- a. A responsible and nurturing figure who values structure and safety. Focuses on stability and long-term well-being.
- 18. Carl Bentley**
- a. Initially antagonistic and self-centered, Carl evolves into a more cooperative participant. Struggles with pride and authority.
- 19. Benjamin Parrish**
- a. A survivor of the original Jumanji game with deep experience navigating its dangers. Strategic, resilient, and empathetic.
- 20. Sarah Whittle**
- a. A cautious yet brave survivor who understands the psychological toll of the game. Values cooperation and emotional resilience.
- 21. Peter Shepherd**

- a. Curious and impulsive, Peter learns adaptability through adversity. Often acts on instinct but grows into responsibility.

22. Judy Shepherd

- a. Intelligent and observant, Judy provides emotional support and rational thinking. Skilled at remaining calm under stress.

23. Alan Parrish

- a. A long-term survivor trapped in Jumanji who develops resilience and survival expertise. Deeply values teamwork and perseverance.

24. Jefferson McDonough

- a. The estranged father of Seaplane McDonough, Jefferson is a principled and stubborn figure who values honor and responsibility. His traditional worldview often clashes with more impulsive adventurers, making him a strong voice for order and legacy-driven decision making.

25. Russell Van Pelt

- a. A cunning big-game hunter and descendant of Van Pelt who is obsessed with conquest and control of the jungle. He is strategic, ruthless, and highly territorial, making him a strong antagonist voice in debates over power, resources, and exploration.
